SUMMARY

Full Stack Software Developer with hands-on experience designing and delivering schema-driven SaaS systems, real-time applications, and performance-optimized frontend architectures. Strong expertise in React, Next.js, Node.js, and MongoDB with scalable UI rendering systems. Focused on building production-ready systems with clean architecture, performance discipline, and maintainable design patterns.

EXPERIENCE

Srishti Innovative

(Jun 2024 - July 2024)

Frontend Development Intern

- Developed responsive e-commerce user interfaces using React and Material-UI.
- Implemented adaptive layouts ensuring consistent cross-device behavior.
- Collaborated with senior developers to enhance usability and component reusability.

Quantzi Infotech

Chennai | 2025 – Present

Software Developer Intern

- Create interactive components, motion effects, and seamless navigation flows to improve usability.
- Translate design and backend requirements into stable, production-ready frontend features through cross-team collaboration.
- Improved performance of animation-heavy interfaces through render optimization and component memoization strategies.
- Enforced accessibility and layout consistency across devices and screen sizes.

PROJECTS

QBuilder – Schema-Driven Multi-Tenant Web Builder (SaaS) | 2026

- Designed schema-based rendering engine enabling dynamic UI generation from structured configurations.
- Implemented drag-and-drop editing system with live preview and configurable component properties.
- Engineered multi-tenant SaaS architecture with isolated routing and reusable templates.
- Developed version-controlled page publishing logic for structured deployment workflows.

Quantzi – Animated Performance-Optimized Homepage | 2025

- Built a modern, high-performance animated landing page using React and TailwindCSS.
- Implemented motion-based UI interactions and hover animations to improve engagement.
- Optimized rendering behavior to maintain smooth performance under animation load.

DRSMusic - Cross-platform streaming app with offline playback (2025)

- Designed the system architecture to support both mobile and web deployment from a unified backend.
- Implemented secure authentication and role-based access control, including protected admin routes.
- Integrated audio/image uploads with file-size validation and cloud storage handling.
- Enabled real-time updates, chat, and activity synchronization using Socket.io.
